

VETERINARY CATALOG

PHARMA 1 VETERINARY

Pharma 1 veterinary also we offer animal supplement, feed and equipment. Our nutrition supplement it is a substance for oral consumption by horses, whether in or on feed offered separately, intended for specific benefit to the animal by means other than provision of nutrients recognized as essential, or for provision of essential nutrients for intended effect on the animal beyond normal nutritional needs. We sell combined feed for various species of horses, livestock and in particular fish including prawns, salmon, trout, sturgeon and catfish. Pharma 1 veterinary produces through our partner companies and laboratories: combined dry food for farmed fish, in pellets, starch content 12.01% (or production in reference buyer request), no dairy products, no genetically modified organisms; it depends on the customer's request and on the availability of ready goods in the various factories where we, as distributors.

Pharma 1 veterinary place a great premium on the environmental responsibility and superior quality of the ingredients that we choose, such as the finest Meal, in order to completely satisfy all the nutritional requirements of aquatic life. We establish enduring partnerships with our suppliers and consistently demand the best in terms of quality.

Human is described as a "rational animal" by Aristotle. The theory highlights the capacity for reasoned thought and reason-based decision-making in humans. Pharma 1 Veterinary's mission is to enhance human-animal relationships by providing premium goods tailored to the unique requirements of both athletes and non-athletes. Our mission is to enhancing the connection involves observing how people and animals interact and learning about their requirements so that it may investigate and find the best options to ensure the welfare of both the animal and the athlete.
