The skin of newborns or small children is very delicate since it only has a thin and not fully developed protective layer. Therefore, the quality of products for its care is extremely important. That is why FITOVITAE BABY only uses vegetal extracts with softening, relaxing and protective characteristics, such as Camomile. Packaging: 150 ml

This cream was purposely studied for the epidermis of babies and helps relieve reddenings caused by external agents. Thanks to Camomile, it softens, protects and soothes the most delicate parts of the skin of babies. It can also be used by dads (after shaving) and mums (to moisture and soothe reddenings on their face and body).

FITOBABY Shampoo and Bath Foam 200 ml The Camomile extract delicately helps cleaning the hair and the scalp through a natural-pH balance foam. It is also perfect as a bath foam as it helps keeping the natural balance of the epidermis
