DATA SHEET:

SUGAR, REFINED WHITE

Fine Normal The granulation process

- ✓ **Polar patten's:** 99.80 degrees minimum
- ✓ **ash materials:** up to 0.04 percent
- ✓ **humidity:** up to 0.04 percent
- ✓ **mg/kg for magnetic particles four SOLUBLE:**
Completely Dry and Free-Flowing
- ✓ **Maximum AS:** One PPM.
- ✓ **OS & PS Maximum:** Two P.P.M.
- ✓ **Maximum CU:** Three PPM.
- ✓ **COLOUR:** Very brilliant white
- ✓ **NO SEDIMENTS;** Twenty mg/kg of sulphur dioxide
- ✓ **LOWERING SUGAR:** Maximum Dry Mass of 0.010%
- ✓ **NO RADIATION:** NO-NOTHING
- ✓ **SUBSTANCE:** Crystalline, solid
- ✓ **SMELL:** Odor-free & scent-free
- ✓ nothing & nill and no radation pathogenic bacteria, such as salmonella and bacillus is equal to zero 0
- ✓ **CROP:** 2024 and subsequent new very clean and high quality crops

Format packaging: 1 gram,5gram,500gram,1kg,5kg,50 kilogramme
(net weight)

Packaging style:big bag,sachet

Material of packaging:Polyethylene or jute or cardboard

Exporter:Pharma1humanitas holdings ltd

DATA SHEET: BROWNE D SOLID SUGAR

- ✓ **Polar patten's:** 97.8 degrees <x> 99.2 degrees
- ✓ **Ash materials:** <0.15% maximum
- ✓ **Solubility:** ninety five percent
- ✓ **Granulometry:** <0.6 mm of regular square granulation medium
- ✓ **Maximum moisture content:** 0.15%
- ✓ **Particles that are magnetic:** TEN per MG/K
- ✓ **So2 (Sulphur Dioxide) :** one hundred and twenty MG/K
- ✓ **Sulphur Dioxide:** sixty MG/K MIN
- ✓ nothing & nill and no virus, radation pathogenic bacteria, such as salmonella and bacillus is equal to zero 0
- ✓ **CROP:** 2024 and subsequent new very clean and high quality crops

Format packaging: 1 gram, 5gram, 500gram, 1kg, 5kg, 50 kilogramme (net weight)

Packaging style: big bag, sachet

Material of packaging: Polyethylene or jute or cardboard

Exporter: Pharma1humanitas holdings ltd

SUGAR BEET

FDIA
FOOD

Format packaging: 1 gram,5gram,500gram,1kg,5kg,50 kilogramme
(net weight)

Packaging style:big bag,sachet

Material of packaging:Polyethylene or jute or cardboard

Exporter:Pharma1humanitas holdings ltd

pharma1humanitas@gmail.com www.pharma1humanitas.com

MEDICAL SUGAR

Format packaging: 1 gram,5gram,500gram,1kg,5kg,50 kilogramme
(net weight)

Packaging style:big bag,sachet

Material of packaging:Polyethylene or jute or cardboard

Exporter:Pharma1humanitas holdings ltd

pharma1humanitas@gmail.com www.pharma1humanitas.com

MEDICAL SUGAR

WHITE & BROWN REFINED SUGAR

Format packaging: 1 gram,5gram,500gram,1kg,5kg,50 kilogramme
(net weight)

Packaging style:big bag,sachet

Material of packaging:Polyethylene or jute or cardboard

Exporter:Pharma1humanitas holdings ltd

pharma1humanitas@gmail.com www.pharma1humanitas.com

WHITE & BROWN REFINED SUGAR

Format packaging: 1 gram,5gram,500gram,1kg,5kg,50 kilogramme
(net weight)

Packaging style:big bag,sachet

Material of packaging:Polyethylene or jute or cardboard

Exporter:Pharma1humanitas holdings ltd

SUGAR POWDER

Format packaging: 1 gram,5gram,500gram,1kg,5kg,50 kilogramme
(net weight)

Packaging style:big bag,sachet

Material of packaging:Polyethylene or jute or cardboard

Exporter:Pharma1humanitas holdings ltd

The secret of the sugar

The current fluctuation in sugar prices is also due to the volatile situation in the crude oil market and the use of sugar for ethanol production. Within the health-care sector, sugar plays a significant role as an excipient in the formulation of numerous medications. Excipients are substances added to a drug's formulation with the purpose of achieving a certain quantity, flavour, or format. It can positively influence the release of this component, but it cannot be classified as an active ingredient because it typically has no therapeutic impact. Moreover, sugar helps keep medication's active components stable over time. Syrups contain sugar, which serves a number of purposes such as improving flavour, thickening and stabilising the mixture, and inhibiting the growth of microorganisms. The sugar within the tablets has two purposes: first, it acts as a helpful excipient for the product's compressibility and internal composition; second, it coats the outside of the tablet in a way that improves the taste of the medication when it dissolves in the mouth. The soluble sachets' sugar is a crucial component that helps the medication dissolve more readily, tastes better, and maintains the active components' purity.
